

## **CLASSIFICATION**

Anthropological and historical studies in ethnopharmacology  
Cardiovascular system  
Central nervous system  
Anthropological and historical studies in ethnopharmacology  
Cardiovascular system  
Central nervous system  
Clinical studies  
Commentaries  
Ear, nose, and oropharynx  
Endocrine system  
Ethnopharmacological field studies  
Gastro-intestinal system  
Immunological products and vaccines  
Infections  
Malignant disease and immunosuppression  
Musculoskeletal and joint diseases  
Nutrition and blood  
Obstetrics, gynaecology, and urinary-tract disorder  
Quality traditional medicines  
Respiratory system  
Reviews  
Toxicology and safety  
Systems biology and omics

## **KEYWORDS**

abortion  
acne  
Skin  
adaptogenic  
aging  
AIDS  
alkaloids  
allergy  
alzheimer  
anaemia  
angiogenesis  
analgesic  
anthelmintic  
anthraquinones  
anthropology  
antiarrhythmic  
antifungal  
antihistamine  
antimicrobial  
antimycobacteria  
antinociceptive  
antioxidant  
antiplatelet  
antiprotozoal  
antispasmodic

antiviral  
anxiolytic  
aphrodisiac  
apoptosis  
Archeology  
arrow poisons  
arthritis  
asthma
