1. Introduction

Please state why this case is important and needs to be reported, including a brief literature review. The background of the case should be described, including the nature of the bone disorder, its prevalence/incidence, its usual presentation and progression, prior treatments and interventions relevant to the case, and a comprehensive but concise description of the presentation if it is a new disease.

2. Case

This section should present all relevant details concerning the case including: a description of the patient's relevant demographic information (omitting any information that might jeopardize the patient's anonymity, such as date of birth, hospital or physician); any pertinent medical

* Corresponding author. Tel.: +0-000-000-0000; fax: +0-000-000-0000; e-mail: author@university.edu

history of the patient; the patient's symptoms; any clinical tests that were conducted and their results; and a description of any treatment given or intervention done. This section may be broken into subsections with appropriate subheadings ('Differential diagnosis,' 'Treatment', 'Outcome and Follow Up' etc.)

3. Discussion

This section is meant to put the case into the context of similar cases, to explain specific treatment decisions, and to share additional relevant information that is not included in the case presentation. Please comment on (1) how the results of this case will significantly change future treatment for this condition and/or (2) the significant implications it may have for future basic science or preclinical work.

4. Acknowledgements

Please acknowledge anyone who contributed towards the study by making substantial contributions to conception, design, acquisition of data, or analysis and interpretation of data, or who was involved in drafting the manuscript or revising it critically for important intellectual content, but who does not meet the criteria for authorship.

5. Conflict of Interest

Please declare any financial or personal interests that might be potentially viewed to influence the work presented. Interests could include consultancies, honoraria, patent ownership or other. If there are none state 'there are none.'

6. References (max. 20 references)

References should be in journal style: <https://www.elsevier.com/journals/bone-reports/2352-1872/guide-for-authors>.

Figures and Tables

Figures and tables may be pasted directly into this template and positioned as they should appear in the final manuscript. Figures, Schemes, and Tables should be numbered. Microscope images must have a scale bar. Structures in schemes should also be numbered consecutively, for ease of discussion and reference in the text.

Ethical Form

Please note that this journal requires full disclosure of all sources of funding and potential conflicts of interest. The journal also requires a declaration that the author(s) have obtained written and signed consent to publish the case report from the patient or legal guardian(s).

The statements on funding, conflict of interest and consent need to be submitted to the journal by filling in a copy of the ICMJE form that can be downloaded from the ICMJE site <http://www.icmje.org/disclosure-of-interest/>. **Please note that your manuscript will not be considered for publication until the Disclosure of Interest Form has been received.**
