Commented [LM34]: DO

*Label with Arabic numerals instead of Roman (e.g. Table 1, 2, 3 not Table I, II, III).

*Include a minimum of four columns.

*Replace all symbols with superscript letters

DON'T

*Punctuate table legends.

* Format text in bold type.

*Include manufacturing information.

Commented [sr35]: Do not use numbers to describe teeth. Use descriptive terms instead.

Table 2. Incidence of failure

Sample (n)	Male (%)	Female (%)	Co (%)	Cr (%)
123	2.204	2.574	50	50
126	2.447	2.644	60	40
113	3.114	3.312	70	30
134	3.235	3.847	80	20

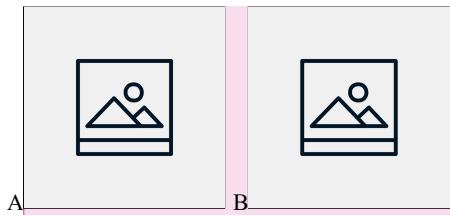

Co, cobalt; Cr, chromium.

Commented [LM36]: Journal style requires that the article ('a', 'an' and 'the') and the verb "to be" are omitted from the figure and table legends.

Commented [sr37]: Acronyms must be defined in each figure and table legend. List these in alphabetical order.

FIGURES

Figure 1. Photographed materials. A, Co-Cr alloy. B, Ni-Cr alloy.

Commented [LM38]: Figure legends should appear in sentence case following "Figure _."

Commented [LM39]: For Figures with multiple parts, please format the legend as depicted (A, _____. B, _____. C, _____. and so on.)

Commented [LM40]: Thumbnails should be inserted *below* each corresponding legend. If your images do not contain part labels, please type uppercase letters to the left of each thumbnail to label each figure part.

Figure 2. Determination of long axis of crown (La). Long axis of crown determined by connecting buccolingual midpoint (C) at cementoenamel junction and central fossa (D).

Commented [LM41]: Thumbnails should be no smaller than 2-inches x 1.5-inches and approximately 72ppi. The goal is to give the editors/reviewers something to review but we want to keep the dimensions and the file size small for easy access.

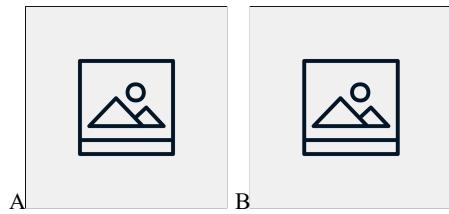

Figure 3. Representative micrographs of fracture surfaces, (Original magnification, $\times 200$),

Ivoclar AG. N, Noritake Dental Supply Co Ltd; M, metal substrate; Z, zirconia substrate; L, layering; P, pressing.

Commented [LM42]: Journal style requires that the article ('a', 'an' and 'the') and the verb "to be" are omitted from the figure and table legends.

Figure 4. Scanning electron micrographs. A, Abraded Co-Cr alloy. B, Abraded Ni-Cr alloy.

Declarations of Interest

19

Authors must disclose any interests in two places:

1. A summary declaration of interest statement in the title page file. If there are no interests to declare, then please state this: Declarations of interest: none.
2. Detailed disclosures as part of a separate Declaration of Interest form, which forms part of the journal's official records.

It is important for potential interests to be declared in both places and that the information matches.

A template form is available at the following link: https://www.elsevier.com/__data/promis_misc/declaration-of-competing-interests.docx

For more information on Declarations of Interest Statements/form(s), please visit the following webpage:
